
THE X39 SYSTEM

The X39 is worn for 12 hours a day anywhere on the body. Remove it after 12 hours, discard it, then rest and rejuvenate for the next 12 hours. Your body's innate intelligence determines where the repair begins, often at the weakest area. You can wear more than one X39 patch if desired, but follow the 12 hours on, 12 hours off schedule to allow your body the maximum benefit from X39.

The X39 is a stem cell activation patch made from lab grown, frequency impregnated, organic crystals. When applied to your skin, the X39 is activated by your body's heat. Your body's heat then releases the frequencies in X39 that have been proven to stimulate GHK-CU copper peptide. X39 is proven to activate, increase, and reset your body's own stem cells to a younger state. Like when you stand in the sun, the frequencies from the sun tell your skin to elevate vitamin D.
